

PROJECT MANAGEMENT & SERVICE AND MAINTENANCE

TAKE THE GUESSWORK OUT OF SECURITY.

Our national team of engineers and technicians have the network expertise required to integrate different components into one comprehensive security solution.

Our professional services provide:

- Strategic analysis and planning
- Design
- System integration
- Consulting
- Project management
- Service and maintenance

Experience the benefits of:

- Reduced installation costs
- More efficient implementation
- Accurate and efficient post-installation support

Diebold Service Advantage

With a network of more than 250 service engineers that service more than 700 locations, we keep your equipment up and running nationwide.

From security cameras to alarms, and DVRs to access control systems, we install, maintain and repair the equipment that you rely on to keep operations running smoothly.

Everywhere There Is A Need

With Diebold, you're never far from help. Whether you have a small, local facility or large facilities nationwide, we'll meet your needs with speed and accuracy. Our call centre is connected to every field technician with the industry's most advanced real-time communication tools, including wireless and cellular technology.
